Muhammad Fayaz Khan

LLM Engineer | RAG Systems & Agentic AI | FastAPI • LangChain •
LangGraph | Open to Remote
Islamabad, Islāmābād, Pakistan

Summary

I'm a self-taught LLM Engineer from Pakistan. I started with basic ML projects and over time moved into building RAG systems, AI agents, and LLM-powered backends. Most of my work is around helping businesses actually use AI, not just experiment with it. Things like building a PDF agent that answers questions from company documents, or an agentic system that handles multi-step tasks automatically. What I build: Document AI: RAG pipelines, PDF agents, internal search AI Agents: tool use, multi-step reasoning, LangGraph Backends: FastAPI, Docker, clean APIs for AI products I've shipped 8+ projects end-to-end and learned most of this through building, breaking things, and fixing them. Tech I use: FastAPI, LangChain, LangGraph, CrewAI, ChromaDB, Qdrant, Pydantic v2, Docker, PyTorch. Open to remote work and real AI projects.

Experience

Freelance | Self-Employed

LLM Engineer & AI Developer

January 2025 - Present (1 year 6 months)

Building production-grade AI systems for real-world applications.

- Built Enterprise RAG Platform with Hybrid Search, Cross-Encoder Reranking & RAGAS evaluation
- Developed BizBrain Business PDF Agent using FastAPI, ChromaDB, Chainlit & Docker
- Implemented LLM Caching (GPTCache) reducing API costs by 40%
- Built Multi-Agent workflows using LangGraph & CrewAI
- Deployed 8+ ML/AI projects end-to-end
- Integrated OpenAI, Anthropic, Gemini & Groq APIs
